

Product Name: Kuri
Company: Mayfield Robotics

Kuri

Background: Mayfield Robotics is launching a first-of-its-kind intelligent home robot named Kuri at CES on Tuesday, January 3rd, at 6:00am PT. Kuri is designed with personality, awareness, and mobility and adds a spark of life to any home.

MSRP: \$699

Availability: Pre-order with a \$100 deposit (starting January 3, 2017) at heykuri.com, U.S. only.

Shipping: Mayfield Robotics plans to ship the first Kuri robots for Holiday 2017.

Behind his clean design, Kuri is powered by serious hardware & capabilities:

- A built-in HD camera so you can check-in on the house or pets while you're away;
- A 4-Microphone array, powerful dual speakers, and wifi + Bluetooth connectivity, so he can react to voice commands or noises, play music, read the kids a bedtime story, or follow you around playing podcasts while you're getting ready for work;
- Expressive eyes, friendly robot language of beeps & bleeps, and multi-color chest light allow Kuri to convey his personality and mood.
- Various sensors for mapping and detecting edges and objects so he knows where he is, and so you don't have to worry about him bumping into that chair you forgot to put away, or rolling down stairs;
- A set of small, yet powerful, electric motors help Kuri move effortlessly around your home – his wheels are big enough to handle a wide range of flooring, carpets, and transitions;
- Easily programmable tasks and IFTTT capabilities to connect within modern smart homes;
- A powerful processor that handles everything from facial and speech recognition, to mapping and entertainment.

Additional features:

- Kuri is 20" tall, 12" wide, and he weighs 14lbs.
- He comes with an accompanying iOS and Android app allowing remote operation, task programming, and review of historical videos/photos.
- Kuri has hours of battery life, and when it's time to refuel, he simply returns himself to his charging dock for a quick charging nap.
